GROOME Industrial Service Group

**** Do This First****

Click "Enable Content"

"Do you want to make this file a Trusted Document?" Select "Yes" and "Do not ask me again"

Overall:

Editable
Pre-filled

Data can be entered into the fields marked in Orange, while the other fields are pre-filled and should not be edited.

Tabs:

Organizations Start here. Use this tab to list the organizations or agencies that oversee our business. You can add groups from any level—national, state, county, or city.

Contacts This tab can be used to enter any key contacts we have at our governing organizations

Documents, Authorizations and Project Plans

The **Documents tab** helps us manage the official documents we're seeking from our governing organizations - like licenses, registrations or permits. The documents we currently have are listed can be listed order of their expiration date (**sort "A-to" Z by Column O**).

Step-by-Step

The **Authorizations tab** helps us manage all the authorized services, authorized employees or authorized work locations a document gives us.

Our **Microsoft Planner** application will be the place we can track all our progress towards licenses of all types. We've made an easy push-button integration from this Compliance Document System to Microsoft Planner for the easy creation of **project plans** for each compliance document we seek.

For renewing a license we've previously obtained, the shortcut "Renewal button" can be used

----------> Renewal Button Shortcut Instructions

For a brand new license (new employee / new organization), read on.

Documents Tab

To start a new project to pursue a license document,

Scroll down to the next available document row in the Document tab

Starting on the left, in Column A, click in the cell, and use the drop-down menu to chose your Organization and State.

If you begin typing in the cell, the drop-down menu will search for you

Next, choose your document category we're seeking (Explosives License, Business License, Contractor License)

Enter in the Country, Government Level, State, County, Municipal information in the same way.

Enter in a Status of "In Progress", and enter your Document Due Date (the date we are targeting to obtain the license)

Now it's time to start entering in our authorizations. To do this, we navigate to the Authorizations tab.

Authorizations tab

Again, we start on Column A. We enter in the organization, an our Document Number will be entered automatically.

Next, we enter an Authorization Number (start at 1, then, as you enter more, 2, 3...)

Authorization Category (Explosives Services, General Contracting, etc...)

Recipient Type (Individual or Company)

Recipient (Company or Employee for whom we're seeking authorization)

This information needs to be entered **for each authorized service** the document will afford the company, and/or each employee whom will be authorized by the document

For example, here we see our Alabama Contractor's License specifically authorizes our company to perform 7 services.
We enter each service category and description we are seeking as it's own record, all with a recipient of Groome (or W-S, as the case may be) in our Authorizations tab.

A	B	E	G	H	I	J
Editable Pre-filled Document	Document Number	Authorization Number	Authorization Category	Recipient Type	Recipie	Authorization Description
Alabama State Licensing Board for General Contractors - Contractor License	3	1	Waterproofing & Sealants	Company	W-S	Caulking
Alabama State Licensing Board for General Contractors - Contractor License	3	2	Boiler & Pressure Vessel Services	Company	W-S	Boiler and Refractory Maintenance and Repair
Alabama State Licensing Board for General Contractors - Contractor License	3	3	Industrial Maintenance & Plant Services	Company	W-S	Industrial Maintenance
Alabama State Licensing Board for General Contractors - Contractor License	3	4	Piping Systems	Company	W-S	Process Piping
Alabama State Licensing Board for General Contractors - Contractor License	3	5	Surface Preparation & Coatings	Company	W-S	Special Coatings
Alabama State Licensing Board for General Contractors - Contractor License	3	6	Waterproofing & Sealants	Company	W-S	Waterproofing
Alabama State Licensing Board for General Contractors - Contractor License	3	7	Industrial Maintenance & Plant Services	Company	W-S	Valve Repair

In another example, we see here how our ATF Notice of Clearance (Document Number 93) authorizes explosives for all the employees listed on it (19 employees).
Each employee is entered in our Authorizations tab.

U.S. Department of Justice Bureau of Alcohol, Tobacco, Firearms and Explosives - Explosives License	93	18	Explosives Services	Individual	Daniel Vanderhoof 0304	Notice of Clearance - Explosives

U.S. Department of Justice Bureau of Alcohol, Tobacco, Firearms and Explosives - Explosives License	93	19 Explosives Services	Individual	Christopher Young 0305	Notice of Clearance - Explosives

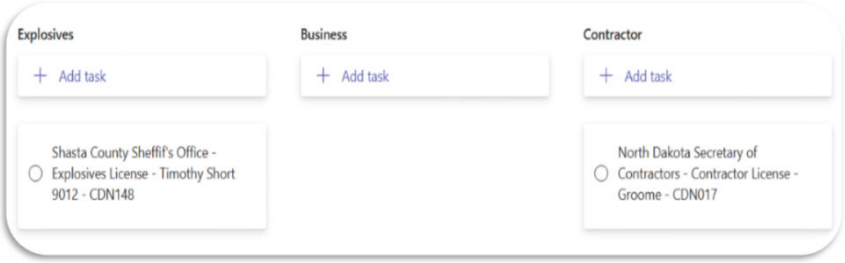
The next three items are less common or skipped for now:

Authorization Location Detail (we use this to enter a specific work site location authorized, if applicable. For instance, a power plant name. In most cases, this stays blank.)
Bid Limit (If we're limited in how large a project we can bid, we can enter that limit here. In most cases, this stays blank.)
Authorization Description (We can leave this blank, for now, until we receive the specific paperwork back from our organization.)

Return to the Documents tab

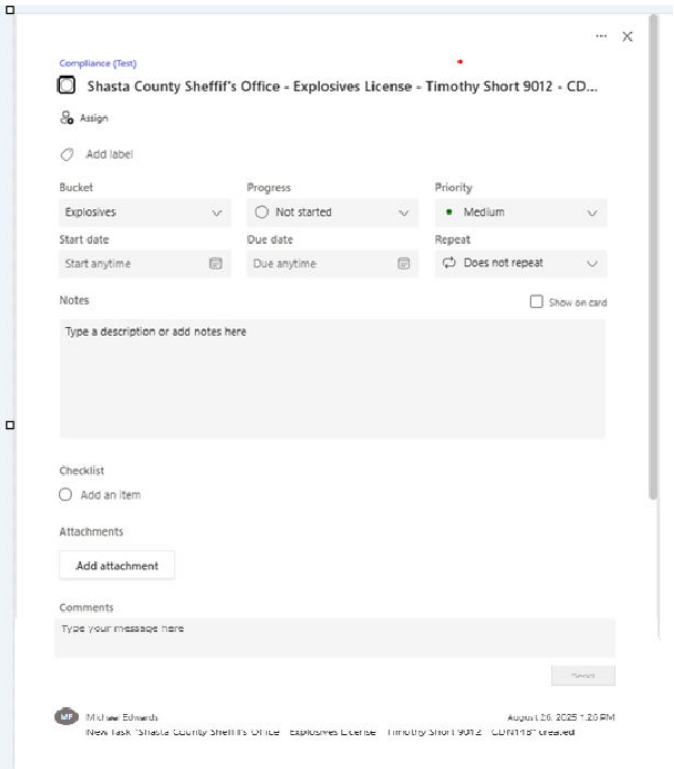
Now, we create **our Project Plan** for this compliance document we're seeking.
Since we've already entered in all our required document information, we can just press a button.
Click on the empty Project Plan link cell in Column T that you want to fill with your linked Project Plan
Click the "Create Project Plan Link" (at the top)
You just created a dedicated project plan for the compliance document we're seeking.
To access the plan you just created, simply click the Project Plan link to take you there.

Microsoft Planner



Our Microsoft Planner system is our place our progress towards licenses.
Each Document's project plan is shown onscreen, organized by the type of license pursued (Explosives, Business or Contractor).
The project names show the Organization we're working with, the license category we're pursuing, the company or employee and a project identifying number.
Please do NOT change this project name to ensure the data links up correctly with our reporting systems.

To work with a project, click on it's icon.



Each Project Plan in pursuit of a compliance document has a lot of information that can be tracked, from simple licenses to the more complex.
The project can be assigned to a staff member, progress, priority, notes and due dates can be assigned,
and a checklist can capture the specific steps along the way to getting our license.
The application process can be captured in screenshots or documents and attached to the project,
and there's a comments feature as well if multiple team members are collaborating on a single license.

Received our License? The final steps:

Microsoft Planner Make sure any application details/screenshots/application documents we'd like to keep note of have been recorded/attached in Microsoft Planner.

Mark the project Complete in planner.

Documents tab

Enter in the document reference number, effective date and expiration date

Authorizations tab

Make sure each authorization sought has been granted by the document, and enter any Authorization Description detail as well.

Documents tab

Now, as our final step, we create our permanent document record
Place the document file into the "processing" folder ----------> Processing Folder
Click the **"Create Final Document Link"** (at the top) of our Document link column (Column Z)
This will make sure there's a permanent record and an easy link to each document.

Once you've created the permanent link for a document, you can easily find and open that document anytime in our Compliance Document Repository.
Just search or browse the repository to access any compliance license you need. --- > Compliance Document Repository

Shortcuts:

The Renewal Button

The Renewal Button helps us re-use current license information to pre-fill the new, in-process license record.

Select the name or company of the license you're looking to renew, in Column N
At the top of Column N, press "Renew License"

The required Document record and Authorization record will be pre-filled based on the selected license we're looking to renew,
with a Document Due Date of 10 calendar days prior to the expiration date of the document chosen to renew.

From there, the rest of the steps (project plan link, working the document renewal in Microsoft Planner,
obtaining the document, closing the plan and creating the final document link) can be taken.

NOTE: For licenses with multiple authorizations, this button only enters the first record and assigns the Authorization Recipient at the company-level.
Therefore, even after pressing the Renewal Button for some initial pre-filled data,
the multiple services and/or employees would still need to be added to the Authorizations tab per the instructions above
